## SUMMARY

- Data analyst with experience in supply operations and inventory management. Ability to make connections between different data sets. Turning problems into solutions through organization, analysis, and interpretation of data.

## PROJECTS

### Influenza Season Staffing Requirements

Analyzed CDC datasets to find limitations and spot trends. I applied data cleaning, visual analysis, forecasting, and statistical hypothesis testing to the data. Staffing plan that was used to ensure that the agency had the necessary resources to respond to the influenza season.

### Instacart, Online Grocery

used data wrangling, data quality checks, grouping, and exporting to prepare the data for analysis. Identified opportunities to increase sales with the targeted market by analyzing the data.

### Rockbuster, Video Rental

Provided insights to the marketing department for the launch of Rockbuster's new online video service. Used data cleaning, joins, advanced filtering, and analysis to identify trends and patterns in the data.

## WORK EXPERIENCE
